

Martin Brady et al.  
Docket 0166  
Appl. No. 09/228,109

REMARKS

The reasons for the drawing amendments are discussed above.

The specification amendments are submitted to correct typing errors discovered as a result of the work done to correct the drawings. The purposes of the amendments are deemed obvious.

Briefly, the change from 238 to 23B is consistent with the original drawings and the mention of 23A, 23C and 23D in sequence in the same sentence.

As for "A8S" it is apparent that the well-known plastic ABS was intended.

Reference character 12 was clearly not appropriate at the end of the paragraph.

A Notice of Appeal from the Office Action of May 25, 2007, will be filed by facsimile today.

Respectfully submitted,

DRAWING AMENDMENTS

To overcome the objections stated in the "Notice of Draftsperson's Patent Drawing Review", and the requirement of the examiner in the Office Action dated May 25, 2007, please substitute the four sheets of drawings submitted herewith for the originally-filed four sheets of drawings.

The drawings are corrected to formal drawings by improved reference characters and lead lines.
